

NICOLAS RUIZ

Sr. Product Owner

Milton, ON · +1 647 883 2626 · nicolasruiz@gmail.com

 LinkedIn  Portfolio

PROFILE

Senior Product Owner with 17 years of cross-industry delivery across Canada and Latin America, including 10 years in SAP consulting and 7+ years in Product Ownership roles within banking and fintech.

Known for identifying operational patterns across data, process, and organizational structure, and translating them into roadmaps and operating models built to outlast the initiatives that created them - including the Scotiabank International Banking data consolidation model, the Technisys company-wide delivery methodology, and the Claro Colombia procurement redesign, all still active today. My consulting background shaped a structured approach to problem-solving, while Agile reinforced the importance of testing assumptions, learning through experimentation, and adapting as new evidence emerges.

EXPERIENCE

Tangerine

Mar 2025 - present

Sr. Product Owner - Payments

- Delivered VISA OCT for domestic and cross-border transfers on time using VISA rails, guiding a newly formed team through MVP and incremental delivery to build platform expertise as the initiative progressed.
- Leading Tangerine's implementation of Payments Canada's Real-Time Rail (RTR) industry initiative - delivering incremental upgrades for Send and Receive 3.6, now advancing to 3.7.
- Created a centralized SharePoint hub for official Payments documentation, adopted as a model across the organization. Built RTR Butler, a Copilot AI agent that draws on the hub's official RTR documentation to answer questions and draft technically detailed user stories.

Scotiabank

Mar 2023 - Mar 2025

Sr. Product Owner - Data & Analytics

- Delivered a data consolidation initiative - previously attempted and abandoned multiple times - successfully integrating retail data from 9 Latin American countries into Canada and designing the operating model now being adopted as the standard across International Banking.
- Initiative drove the creation of new Retail analytics departments and is actively expanding into Risk, Wealth, and Commercial; analysis surfaced CAD 47M (4%) in expense reductions incorporated into the F25 Plan and shareholder reports. Also pioneered a centralized SharePoint documentation model - later adopted as a team standard.

Technisys

Jul 2021 - Feb 2023

Product Owner - Agile Delivery Methodology

- Designed and documented the organization's end-to-end delivery methodology - including reusable artifacts, guidelines, and flexible agile frameworks adopted company-wide - compressing client Discovery from 5 months to 2-3 weeks and reducing per-project costs by USD 30K/quarter.
- Methodology drove customer satisfaction from baseline to 90%+ while a multi-country estimation model cut time and cost deviations by 50%, giving leadership a reliable forecasting tool for the first time.

EXPERIENCE / CONTINUED

Scotiabank

May 2017 - Jul 2021

Product Owner & Scrum Master - Retail CRM

- As Scrum Master, joined a high-potential team with strong leadership support and became instrumental in elevating its agile practice - through deep conviction and hands-on coaching - earning top-5 recognition among all agile teams at Scotiabank.
- As Product Owner, conceived and led a next-generation CRM vision - cross-channel lead management, AI-driven next best action, and customer-centric flows with full behavioural insights - years ahead of industry adoption. Secured CAD 3M in funding through executive roadshows, deployed in Chile and actively expanding across the region.

SAP Consulting

2006 - 2017

Business Consultant & CoE Supervisor

- Re-engineered procurement and reverse logistics at Claro Colombia - cut procurement times by 66%, saving \$750K USD/year in logistics and \$180K USD in warehouse costs.
- Built and led a high-performing SAP support team, growing CSAT from 70% to 90% and eliminating a 2-year open backlog within months.

10 years of ERP implementations across telecoms, pharma, food processing, and financial services in Argentina, Colombia, Peru, Mexico, Chile, and Uruguay - every project delivered successfully.

AI & EMERGING TOOLS

Use ChatGPT, Claude Code, Claude Design, and APIs to build applications, analyse information, and automate routine workflows. Projects include native iOS and web apps, financial dashboards built from raw files, and a health tool that interprets bloodwork and suggests next steps. Applied AI at work through RTR Butler, a Copilot agent supporting RTR knowledge sharing and user-story development. Also create executive presentations, images, and short-form video using AI tools, including Higgsfield.

SKILLS

Product: product ownership, roadmapping, backlog management, design thinking, UX discovery, impact mapping

Analysis & Data: Power BI, Excel / VBA, KPI design, process optimisation, financial modelling
